

KSeF INSIGHT

STANDARD

KSeF INSIGHT Standard is an IT solution designed for issuing structured invoices to and from the National System of e - Invoices (KSeF).

- Efficient communication with the National System of e-Invoices
- Safe integration with the API of the Ministry of Finance
- Full compliance with legal regulations

Solution compliant with the requirements of the Ministry of Finance

Professional support in the implementation of the new invoicing process in the company

Ongoing updates to ensure compliance with the regulations

KSeF INSIGHT Standard - send and receive electronic documents to and from the National System of e-Invoices

CHECK HOW IT WORKS!

- Integration with financial and accounting systems - the solution ensures secure and standardized communication between KSeF and domain systems
- Authorisation management in accordance with the standards of the Ministry of Finance
- Invoice generation - standard invoices collected from the financial and accounting system and converted into xml format
- Invoice acceptance - acceptance of purchase invoices directly in KSeF INSIGHT, followed by transmission of a relevant notification to the finance and accounting systems
- Automatic invoice validation in terms of content and technical aspects compliance
- Invoice correction - KSeF Enterprise allows to notify the contractor of any incorrect invoices directly from the system
- Structured invoice repository - storage of invoices in one place allows full control over documentation
- Sending structured invoices at any time via the API service
- Sending automatic notifications to recipients of issued documents via e-mail
- Invoice visualisation - structured invoice preview in format

ADVANTAGES OF KSeF INSIGHT STANDARD

Automation of time - consuming manual document sending process

Optimisation of accounting settlements

Sending e-invoices without the need to log into the system of the Ministry of Finance

Sending invoices to KSeF in real time
